

Session 1.7 – Assessment of the mangled hand: Principles for Functional Reconstruction

Objectives:

- Understand the basic indications for plain radiographs in hand and upper limb trauma
- Describe common pathologies on plain radiographs of the hand and upper limb
- Understand the indications for advanced imaging techniques in upper limb trauma

Primary Resources:

1. BFIRST/BSSH webinar: Hand and wrist imaging (3:00:47)
<https://www.youtube.com/watch?v=VE3mZh7ltQM>

Additional Resources:

1. Pulvertaft webinar: radiographic imaging of the hand and wrist video (1:10:00)
<https://www.youtube.com/watch?v=NJJKag3Ce04>
2. Pulvertaft webinar: MRI of the wrist video (59:44)
https://www.youtube.com/watch?v=T_nvkJG94
