

Session 3.4 – Finger tip and nail injuries

Objectives:

1. Understand the relevant anatomy of the fingertip and nailbed
2. Understand the normal physiology of nail growth and how this is affected by trauma
3. Discuss the surgical management of nailbed injuries
4. Discuss the treatment options for fingertip injuries including amputation and flaps

Primary Resources:

1. Pulvertaft Webinar: The Nail anatomy physiology and management
(https://www.youtube.com/watch?v=zt8x_sY4fn0)

Additional Resources:
